# Past and Present

During the past few months the Group has been trying to build stronger and more appealing foundations. As promised to its Stakeholders in 2023, the Group has now focused on what it had done, and is making it better. By better, the Group means better reputation and better service.

The Group became, in September 2025, a licensed authorised corporate service provider ACSP. Acting under supervision at Companies House, not only provides a safer «paper work» haven for the Group incorporated Clients, but speeds up the operations.

The Group, while keeping still the doors shut for new customers, is still working on handling the potential ups and downs from existing customers. Therefore, the terms and conditions for leaving customers were made more flexible and less tedious to comply with. On the contrary, when an existing customer adds one partner or worker or stakeholder, the Group is now offering a better entry system. Before, a customer had to sign a power of attorney for each new business members. Now a customer can simply leave this to the Group, who is keeping and maintaining the new member's data as the data of the existing customer with only one signature and power of attorney.

The Group understands that the words «doors shut» mentioned in the previous paragraph are not words suitable to a Group which wants to work for the Public without barriers. However, like a fully booked hotel, this is not simple to achieve. The Group wants to keep

its doors opened but for now it can only welcome existing Clients' new business members.

The Group has set aside, in 2024, a team which focuses solely on Consumer rights law and Consumers Data protection law. By doing so, each customer and each customer's business partners flows inside the Group's databases with more clarity and protection.

In 2025, the Group has worked a lot on its Copyright. Customers' work has always been protected by the Group's Copyright policies. However, as Customers' activities becomes more complex the Group has to increase its Copyright protection. Each work made by a third-party towards a Customer of the Group cannot be included in the Group's Copyright protection under the same terms and condition of services. Therefore, in Autumn 2025, the Group started working on this. More than £1500 were spent on research and it emerged that it is only necessary an insurance policy by the Customers to allow the Group to work on behalf of the Customers' related third parties.

Today the Group boasts one head office in the United Kingdom and one branch in Italy. The latter is still merely a consulting and human resource service provider which works under Italian Law. While the ambition is to become a legal representative for Italy based Clients, the Group's resources, at present, cannot offer that. Shutting social chats apps in 2021 was a first step towards showing the actual resources that the Group can now offer to its Clients.

# Synergies

The Group has effectively extinguished any loophole which was present in its Copyright policies. The Group's business contacts welcomed positively this effort made by the Group. Working in a busy and fragmented environment such as London, England, makes it very important to the Group to work stress free on behalf of Customer who sometimes may lose money simply by receiving a dodgy mail forwarding.

The Group was able to deal a better lease for its Head Office in Farringdon. This saved £1900 in 2025. Some savings were spent in Italy in order to enhance the Group's presence abroad as a goods and services exporter mainly. The Group understands that in a fragmented environment such as the import and export one, sometimes, you need to invest time and money to obtain some control on the people involved in the production, storage and packaging of a good or, why not, even a service.

The Group worked closely with the Council of Wandsworth in winter 2025 when it brought one of its senior employees to British Citizenship. The Ceremony took part in the south west London Town Hall. The Group is keen on participating in the London neighbourhoods political life.

In conclusion, a word must be said about digital synergies. The Group has relied on those since it opened in 2012. Today the Group boasts a lot of experience in dealing with digital synergies such as the people involved in any HR of a business which cannot meet its customers every day. The Group never wants to lose touch or Data protection with such contacts.

# Markets

The Group concentrated on the United Kingdom from 2024 to the end of 2025. Regardless of the industry, the Group dedicated a lot of time researching in the Administration area of any business which could be involved in the Group. It is very important for an Accounting business, such as the Group, to provide consultancies on what the Group thinks is good administration or bad administration of a business. Guided by the Ethics learned from the Financial Reporting Council principles and the rules at the OECD, the Group started to examine each operation made by itself firstly. Dedicating more time to this can only result in a better service the Group thinks.

In 2013 the Group had tried to regulate the aspects of letting an estate agent's lease. The Group, this year has come back to this without operating it but only

consulting on it. The letting market is the Market the Group can rely on if it thinks to reopen its doors, employ an apprentice and expand operations. This is possible also after the last two years news on the currency market. The upward pressure of the British Pound against the Indian and Pakistani Rupee could open to possibilities that before were not possible or expensive.

The Group found its apprenticeship provider in 2025. The employment market offered the Group very interesting opportunities from the British Government: the Group will pay the students, who are provided by the apprenticeship provider, for some work in office during the week. The work will be routine and some phone calls. The student and worker will be followed by the Group's utmost experienced staff who will supervise the worker under insurance and follow the learning.

# Environment

«The Group environmental accounting has not moved from anywhere since it started in 2021. We offer business record keeping, shredding and recycling free of charge to all existing Clients»

The search for heavy duty paper recycling machines has started in 2023. The Group will soon be able to produce, shred and recycle, either with authorised third parties or on its own, customised copyrighted delivery notes, invoices and business contract templates to its Clients in the United Kingdom, who work under British Law.

May2024

Simone Gorini

Director

# Prospects

SIMPARTNERS GROUP, every year, aims at improving its terms and conditions of service. The new terms and conditions will be published soon.

The Group will look at its salaries budget more deeply in 2026 because more time and effort will be dedicated to the addition of staff next year. More staff might mean reopening the doors to the Public in 2026.

Overseas operations started again in 2025 when the Group invested £1400 in new technology for banking and for electronic filings to Italian Fiscal Authorities.
